SUMMARY

Machine Learning Engineer and Full-Stack Developer with production experience in agentic AI, deep learning, NLP, and computer vision, currently Technical Team Lead at a real estate company. Ships end-to-end systems from model training and fine-tuning through production deployment, using FastAPI, Django, Next.js, and LangGraph. Delivered 8+ production systems including agentic RAG pipelines, a multi-tenant CRM, and enterprise billing platforms serving real users.

PROFESSIONAL EXPERIENCE

Technical Team Lead, Family Realtors PK

Feb 2026 – Present · Islamabad, Pakistan · Hybrid

- Own the company's technology strategy and delivery: web presence (familyrealtorspk.com) and an agentic multi-tenant CRM with role-based access control and Meta/Google Ads API integration
- Lead planning and improvement of internal software systems, IT operations, and data workflows
- Deliver technology across the stack, spanning DevOps, infrastructure, and data analysis, to support daily real estate operations

Freelance Machine Learning Engineer, Self-Employed

Mar 2023 – Feb 2026 · Remote

- Built and deployed production ML applications for clients across content generation, real estate, and data extraction
- Specialized in agentic AI systems with LangGraph, RAG pipelines, LLM fine-tuning, and full-stack delivery with Django and the FARM stack

Private Tutor, One-on-One, In-Person

2024 – Feb 2026 · Rawalpindi, Pakistan

- Tutored CCNA networking, data science fundamentals, full-stack web development, and advanced mathematics (calculus, linear algebra) with customized learning plans

FEATURED PROJECTS

Family Realtors PK: Full-Stack Real Estate Platform

Feb 2026 – Present

Production platform with property search, blog CMS, and admin dashboard. Next.js 16 and React 19 frontend, FastAPI and PostgreSQL backend, Google OAuth, Cloudinary media, Dockerized on Railway with Jest, Pytest, and E2E coverage.

CRM 2.0: Multi-Tenant SaaS Platform

Feb 2026 – Present

Multi-tenant real estate CRM with database-per-tenant isolation (Neon serverless), a four-tier role hierarchy, and a LangGraph AI assistant scoped by RBAC. FastAPI and React/TypeScript, real-time SSE notifications, Cloudflare R2 storage.

Enterprise Wholesale Management System

Aug 2026

Inventory and billing platform for wholesale distribution: multi-stage discount engine, moving-average cost tracking, and double-entry dealer/vendor ledgers across a 1,000+ product catalog with 3,500+ variants. FastAPI, PostgreSQL, React/TypeScript; verified by 236 end-to-end browser tests and an independent arithmetic oracle over 3,500+ calculation cases.

Agentic RAG System with Hybrid Search

Nov 2025 – Dec 2025

Agentic RAG application with LangGraph query routing, self-hosted on Modal.com serving Qwen 8B on L4 GPUs with BGE-Large embeddings and a BGE-Reranker for hybrid search. Containerized for Railway and Koyeb.

LinkedIn & Facebook Content Generator Web App

Jun 2025 – Aug 2025

Progressive web app in Django and PostgreSQL with an agentic LangGraph content generator, LinkedIn Developer API posting, cron-based scheduling and notifications, and Google social auth.

Production-Ready LinkedIn Scraper REST API

Nov 2025 – Dec 2025

REST API extracting LinkedIn profile data in real time via persistent Chrome sessions with one-time authentication, returning structured JSON over HTTP.
